SYSTEM INQUIRY QUESTION: What impact will collaborative teaching and learning, that focuses on the assessment for learning process, have on increasing the number of students approaching, achieving at or beyond the provincial standard K-12?

URGENT STUDENT LEARNING NEED: Students need to be actively engaged in worthwhile learning tasks and assessment practices that promote productive struggle as a component of their learning.

SCHOOL-THEORY OF ACTION: If we use collaborative teaching and learning strategies that focus on assessment for learning, specifically for identified markers students. Then there will be an increase in the number of applied pathway students achieving provincial standard in course achievement, numeracy and literacy.

### MONITORING OUR STUDENTS’ LEARNING

Ongoing reflections that will support efforts to know our learners and monitor student growth:

- Where did our students begin? How did we document and measure student learning?
- How have our changed instructional and/or assessment practices show impact through the number of students achieving at or beyond the provincial standard?
- How do we know that all students have shown growth?

---

### NEXT STEPS:

- What will we do next as a result of our learning and reflections?
- How does our new learning inform our MYSP priorities?
- How will we mobilize our successful evidence-based strategies?
- What additional student and educator learning needs remain?

---

### MONITORING OUR PROFESSIONAL LEARNING

Ongoing evidence of the impact of collaborative professional learning:

- How did we document and measure educator learning?
- How has our participation in collaborative teaching and learning changed our teaching practice?
